

Perfect Digital Photo Printing Solutions

# Profit from the Best

# Expand Your Business Opportunities

Sinfonia Photo offers you a line of Sinfonia products that are perfect for high speed in-store applications or event photography volume that do not require an expensive mini lab. Our dye-sublimation printers are the alternative to digital mini labs.

Until 2009, Sinfonia printers were branded as Shinko. The renaming of a great line of high performance printers to Sinfonia continues the legacy of reliable, Japanese made, dye-sub printers for the expanding retail market.

These printers provide fast, high quality prints made easy and affordable for all applications: professional studios, event photography, kiosk, sport and team photography, traveling portrait and baby photography, passport, photo booth, insurance, law enforcement, and MORE!

## **Print Instantly**

KG Instant Print Software gives you the ability to instantly print while you shoot. Works with WiFi, on your local area network or simply import pictures from your digital camera card to compose, format and print high quality photos... INSTANTLY!

**Resize** - images can be automatically resized, rotated and printed to a variety of settings.

**Borders** - easy configuration to automatically add borders, title areas or file names to your prints.

**Batch print** - edit photos and then print entire jobs automatically.
